ACDelco Introduces Full Line of Window Regulators

GRAND BLANC, Mich. – ACDelco has launched a full line of replacement power window regulators to its product lineup, allowing distributors and service providers to provide an even wider range of OE-quality door system components for the most popular makes and models on the road today.

ACDelco door system components include window lift motors, motor/regulator assemblies, gear kits, power window switches and door lock actuators. ACDelco window lift motors are all-new, not remanufactured, and cover 862 SKUs to ensure most customers' needs are met.

“With ACDelco’s broad range of door system components, there is no need to compromise quality with unknown aftermarket parts,” said Nancy McLean, director, ACDelco and wholesale marketing.

ACDelco window lift motors carry a 12-month, 12,000-mile warranty. They are direct fit, include connectors, and are designed to make replacement easier for installers. All ACDelco motors pass tests for durability, heat and freezing, impact, noise, fit and self-locking.

To learn more about quality ACDelco door system components, consult an ACDelco distributor or visit acdelcotechconnect.com

About ACDelco: ACDelco markets quality parts for Ford, Chrysler, Toyota, Nissan, Honda, GM and most vehicles on the road today. To find an ACDelco parts retailer, visit acdelco.com or call 1-800-ACDelco.
